

Introduction to Technology Investment Meeting (TIM)

One of the areas owning potentiality to extend technology cooperation among technologists is the technology investment issue. Technology investment possesses varieties and ventures that absolutely differ from investment in other areas in industries. Technology investment appears profitable and secure in many products that are required in societies and differs in innovative products with their hazards called Venture Capital.

D-8 TTEN is organizing Technology Investment Meeting (TIM) to synergize investors in member countries to invest technologies and innovations in Member States so that opportunities and sources could be approached together.

The history of VC activities in D-8 member countries is different in countries. In Iran, Indonesia, Malaysia and Turkey VCs have been operated since three decades ago meanwhile other countries have the recent experience of attention toward VC funds like Bangladesh and Egypt.

Concerning the above mentioned notes, D-8 TTEN Secretariat planned the 1st TIM as a meeting of VC Funds from Member States and other invited countries to exchange experiences and financing models, define future cooperation and create road map for future meetings.

Therefore, the Meeting is named as,

TIM 2017: D-8 VC Funds, Experiences and Financing Models
